

BEAUTY

Home | Coverings | Fabric | Beauty

If beauty is the result of the measured balance between the parts, Beauty embodies its essence; a fabric provided with a unique design whose pattern originates from a precious interplay of mirrored geometries which creates a sophisticated and nuanced dance of colors.

TOSCA

Home / Coverings / Fabric / Tosca

Ecological fibres deriving from the recycling of polluting waste recovered, reprocessed and transformed into new products, with a significant reduction of non-biodegradable waste.

Bouclé made of 47% recycled polypropylene, partly from non-woven production waste (offcuts, second choices, non-conforming materials) and partly from yarn production scraps or leftovers.

These waste, destined for landfills, are recovered, reprocessed, refined and reintroduced into the market in a new form.

The production process does not require the use of water or chemicals, minimises CO₂ emissions, and reduces the production of new materials, without neglecting the technical or aesthetic aspects of the fabric, which remain absolutely unaltered.
